

N. V. (Nick) Lavrik

R&D Staff

Nanofabrication Research Laboratory
Center for Nanophase Materials Sciences
Oak Ridge National Laboratory
(865) 241-2636
lavriknv@ornl.gov

Education

Kiev Polytechnic Institute, Kiev, Ukraine Institute of Semiconductor Physics, Kiev, Ukraine	Electronic Engineering Physics	M.S., 1987 Ph.D., 1994
---	-----------------------------------	---------------------------

Professional Experience

2007–present	Research Staff Member, Center for Nanophase Materials Sciences, ORNL
2006–2007	Research Staff Member, Nanophotonics Laboratory, Engineering Science and Technology Division, ORNL
2001–2006	Research Assoc., Oak Ridge National Laboratory, Oak Ridge, TN
1999–2001	Postdoctoral Research Associate, University of Tennessee–Knoxville
1996–1999	Postdoctoral Research Associate, University of Illinois, Urbana-Champaign
1988–1996	Research Staff, Institute of Semiconductor Physics, Kiev, Ukraine

Professional and Synergistic Activities

2008– present	Member: Materials Research Society
1998–present	Reviewer for: <i>Nano Letters</i> , <i>Nanotechnology</i> , <i>Applied Physics Letters</i> , <i>Thin Solid Films</i>

Honors and Awards

2012	R&D 100 Award, Broadband Micromechanical Antenna
2011	R&D 100 Award, Nano-Optomechanical Hydrogen Safety Sensor Based on Nanostructured Palladium Layers
2010	R&D 100 Award, Ultrasensitive Nanomechanical Transducers Based on Nonlinear Resonance
2008	ORNL Director's Award, Outstanding Team Accomplishment in Science and Technology
2003	R&D 100 Award, Development of Uncooled IR camera

Publications (Over 60 refereed publications, including 3 invited reviews and 3 book chapters)
Publication list follows CV.

Research Synopsis

1. Nanoscale photonic and plasmonic structures

We seek to identify and explore novel fundamental phenomena in nanophotonic and plasmonic structures using a combination of analytical modeling, computational electrodynamics (FDTD method) and newly developed nanofabrication strategies. Of our particular attention are hybrid nanophotonic/plasmonic structures that can be designed to exhibit remarkably strong local field enhancements due to synergetic interactions between dielectric subwavelength resonators and noble metal nanoparticles that possess localized surface plasmon resonances.

2. Mass transport and separations in nanoscale fluidic systems

Deterministically created porous media as well as individual channels and pores are excellent model objects for studies of mass transport, separations, and interfacial interactions in the ultimate limit of nanoscale confinement. Using wafer scale technological processes and lithographic patterning, we implement and explore multiscale fluidic structures that can be interrogated optically, electrochemically or electromagnetically. A complementary combination of analytical models and finite element analysis is used to guide our design of our experimental systems.

3. Nanoscale mechanical phenomena

We combine analytical, numerical and experimental studies of mechanical phenomena in nanoscale and multiscale structures and aim to identify their unique aspects associated with the reduced dimensionality, nonlinearity and thermally induced fluctuations. Advances in nanofabrication and nanotechnology facilitate fabrication of harmonic and unharmonic oscillators that can be almost arbitrary scaled down approaching the molecular scale. On the other hand, mechanical structures in the upper limit of the nanoscale offer many unique advantages to an experimentalist. Their remarkably high sensitivity to external chemical, electromagnetic and thermal stimuli allows us to create model systems that function as an elegant interface between micro and macro worlds.

Graduate and Postdoctoral Advisors:

Graduate Advisor:	Prof. B.A. Nesterenko (Institute of Semiconductor Physics, Kiev, Ukraine)
Postdoctoral Advisors:	Dr. Deborah Leckband, University of Illinois-Urbana Dr. Michael Sepaniak, University of Tennessee-Knoxville Dr. Panos Datskos, ORNL

Graduate Students Advised: Dragoslav Grbovic, Salva Mostafa (co-advised)

Postdoctoral Scholars Advised: Tim Bannuru. (co-advised)
